

The figure is a heatmap visualization. The X-axis is labeled 'Layer Depth' and ranges from 0 to 48, with major ticks every 4 units. The Y-axis is unlabeled but represents a categorical or sequential dimension. The color scale ranges from dark purple (low values) to bright yellow (high values). The plot shows a distinct pattern of high values (yellow) in the first four rows, which transitions to lower values (purple) in the fifth row, and then back to high values (yellow) in the sixth row. The X-axis is labeled 'Layer Depth'.
